SAA award recipients are selected by individual committees of SAA members—one for each award. The Board of Directors wishes to thank the award committees for their hard work and excellent selections, and to encourage any members who have an interest in a particular award to volunteer to serve on a future committee.

**Presidential Recognition Award**

**Recipient:** 75th Anniversary Task Force (members: Jerry Sabloff, James Snead, Wendy Ashmore, David Browman, Don Fowler, Lisa Lecount, Linda Manzanilla, Bruce Smith)

The Task Force for the 75th Anniversary has developed a unique and substantive program of events to mark this anniversary, including a first-time Film Festival with over fifty entries, an edited volume that represents a breadth and depth of thoughts on the multiple voices of contemporary and future archaeology, a meeting program of scholarship that displays the best of archaeology today, fieldtrips, a dance and other events that has drawn one of the largest attendances at an SAA Annual Meeting. The fiscal and material support of many who have contributed 75th Anniversary items and a program that was envisioned and implemented in a timely and professional manner are some of the hallmarks of this Task Force and their remarkable contribution to this event and to the SAA.

**Presidential Recognition Award**

**Recipient:** Fundraising Committee (members: William Doelle, Susan Bender, Cathy Cameron, John E. Kelly, Paul Minnis, Linda Pierce, Bruce Rippeteau, Martha Rolingson, and Ken Sassaman)

The Fundraising Committee set its goals on a substantial target of funds to raise to help sustain key projects and the overall mission of the SAA. Under the dedicated and relentless leadership of Bill Doelle, the committee generated creative ways to reach the membership, including a close-out campaign based on a matching gifts program, original ads, buttons and slogans, and extraordinary one-on-one efforts to provide potential donors with both the encouragement and recognition to donate to the SAA Endowments. With the termination of the Campaign to “Give the SAA a Gift on its 75th” at this meeting, we are extremely grateful for heroic and sustained efforts by this Committee to provide a continued material base for the activities and programs of the SAA well into the future.

**Gene Stuart Award**

**Recipient:** Andrea Cooper

Andrea Cooper, a freelance journalist and essay writer, has earned the 2010 Gene S. Stuart Award for her thoughtful, informative, and timely article about ongoing changing relationships between archaeological and Native American communities. “Embracing Archaeology” focuses on the dynamic perspectives of The Eastern Band of the Cherokee regarding the value of archaeology as a means to understanding Cherokee history. By focusing on individuals, Cooper brings to life difficult issues while shedding light on the points of view of both communities. Her sensitive discussion of the intersection of Native interests and those of the archaeological community highlights emerging interests in developing archaeological expertise within Native communities and for Native interests. The subject matter of this piece is timely, discussing both the value of archaeological work for Native communities and the value of cooperation by archaeologists with Native communities for promoting archaeological research.

STUDENT PAPER AWARD
Recipient: John M. Marston
This year’s SAA Student Paper Award is presented to John "Mac" Marston of the University of California at Los Angeles for his paper titled “Identifying Agricultural Risk Management Using Paleoethnobotanical Remains.” Marston compellingly employs a combination of theory and archaeological data to argue that the degree of agricultural diversification practiced by a society is a good indicator of the level of that society’s perceived need to manage economic risk. To demonstrate this, he identifies lines of paleoethnobotanical evidence that indicate agricultural diversification (e.g., agropastoralism, field scattering, seasonality) and intensification (e.g., irrigation, foddering) and tracks changes in economic practices at the site of Gordion in central Turkey from ancient through Medieval times, interpreting those data within broader historical contexts. His conclusion that economic diversification is a better indicator of risk management than is economic intensification has implications for studies of agricultural societies outside Anatolia, and potentially even for non-agricultural societies.
DISSERTATION AWARD
Recipient: Sarah Clayton
Sarah Clayton’s dissertation, “Ritual Diversity and Social Identities: A Study of Mortuary Behaviors at Teotihuacan” (Arizona State University, 2009), explores the role of mortuary practices in the ritual formation of social identity and social difference at Teotihuacan. Comprehensively synthesizing mortuary, bioarchaeological, and household data from three locales within the city and from a nearby rural settlement, the author uses painstaking qualitative and statistical analyses to show the extent to which basic residential groups were socially delineated through distinctive burial treatments and associated ideologies. The work draws fruitfully from diverse bodies of theory to present a House Society and practice theory approach to Teotihuacan mortuary activities that lucidly uncovers their role in the formation of gender, age, class, ethnic and residential identities. This research, offering a new view of Teotihuacan’s social topography, illustrates the analytical potential of ritual practices in studying key issues of social dynamics and integration in complex societies.

AWARD FOR EXCELLENCE IN PUBLIC EDUCATION
Recipient: Project Archaeology
Project Archaeology has earned the SAA Excellence in Public Education Award for the curriculum entitled Investigating Shelter, a module designed for grades 3-5, the latest example of its long-standing commitment to provide quality education about archaeology to the public. Investigating Shelter is a creative and unique national curriculum that uses archaeology to teach scientific inquiry, citizenship, personal ethics, and cultural understanding. The content features actual archaeological and historical data and oral histories from different sites to allow classroom applications to be most relevant to the regions where they are used. The module underwent rigorous and thorough testing and evaluation by a wide range of educators and archaeologists and is promulgated to an ever-wider audience through the Internet. The Investigating Shelter curriculum module can be a model for others for its inclusion of a variety of opinions and viewpoints during its development, and for its use in classrooms with underserved students.

BOOK AWARDS

The Society for American Archaeology annually awards a prize honoring a recently published book that has had, or is expected to have, a major impact on the direction and character of archaeological research, and/or is expected to make a substantial contribution to the archaeology of an area. The Society for American Archaeology also annually recognizes a book that has made, or is expected to make, a substantial contribution to the presentation of the goals, methods, and results of archaeological research to a more general public.

BOOK AWARD
Recipient: David W. Anthony, The Horse, the Wheel, and Language: How Bronze-Age Riders from the Eurasian Steppes Shaped the Modern World
The Horse, the Wheel, and Language is a revolutionary melding of complex linguistic data with the rich archaeological record to address the formerly intractable problem of Indo-European origins. David Anthony deftly pulls together the linguistic arguments, a large body of Russian archaeology not generally accessible to the English-speaking world, and his own extensive research to address big questions, such as the extent to which language borders can be detected with material culture, the role of migration as an explanation for culture change, and the origins of pastoral nomadism. Anthony’s accomplishment is inspiring in its scope and commitment to seriously engaging complex and detailed archaeological evidence, ranging from individual sites, graves, and artifacts, while
challenging the traditional archaeological skepticism of linguistics. Anthony’s writing strikes an effective balance between accessibility and erudition. Princeton University Press has published the work handsomely and with conscientious attention to accuracy.

**BOOK AWARD: PUBLIC AUDIENCE BOOK AWARD**

Recipient: Rebecca Yamin, *Digging in the City of Brotherly Love: Stories from Philadelphia Archaeology*

*Digging in the City of Brotherly Love* brings eighteenth-century Philadelphia alive as Rebecca Yamin weaves together the material remains of the city’s colonial residents with its rich historical record. Integrating discussions of specific artifacts and sites with a broad historical perspective, Yamin does an admirable job of integrating a considerable body of research that too often remains buried in the so-called grey literature. The result is an admirably concise yet rich summary of Philadelphia’s historic archaeological heritage. But this is more than an archaeologically informed history of Philadelphia. Yamin also conveys much about the value of Cultural Resource Management as well as the challenges and rewards of doing urban archaeology. Yamin has a strong voice and communicates her passion for her work, along with its frustrations. The tone, content, and visual organization of this book are exemplary. Yale University Press has done Yamin proud with a well produced volume exhibiting effective design and a conscientious attention to accuracy.

**AWARD FOR EXCELLENCE IN ARCHAEOLOGICAL ANALYSIS**

Recipient: Timothy A. Kohler

Timothy A. Kohler is awarded the SAA’s Excellence in Archaeological Analysis Award for his pioneering and sustained contributions to understanding Pueblo ecodynamics using simulation, his worldwide reputation for developing agent-based models of archaeological and related data, his important contributions to understanding Puebloan demography through accumulations research, and most recently through his identification of a late but significant Neolithic Demographic Transition in the US Southwest, and finally, for his leadership in developing PhD training that emphasizes evolutionary modeling. Results of Tim’s research are published in a broad venue and are cited widely, but he has also worked to translate his research to the general public and to the greater scientific community. Tim is a worthy recipient of this award for his life-long commitment to modeling human ecodynamics in prehistory and for his work in developing agent-based modeling as a tool for archaeologists.

**AWARD FOR EXCELLENCE IN CULTURAL RESOURCE MANAGEMENT**

Recipient: William H. Doelle

William H. Doelle has earned this award for his outstanding research, his steadfast commitment to original research as a key part of the CRM industry, and his untiring support and encouragement of research among his staff, students, and colleagues. The strength of his vision of applied archaeology serving a bigger mission is an inspiration to all who know him and his work. Even as many other CRM firms increasingly take a bureaucratic or compliance-only approach to archaeology, his vision is one in which research is at the forefront, serving the client, the public, and the profession. He insists that research and preservation must be the engines that drive the CRM process. The work he undertakes is done for the purpose of preserving places and knowledge for future generations; it is done for building meaningful collaborations among researchers and Native peoples; and it is done to foster a sense of community for the public as we grow to know and appreciate the history that surrounds us.
CRABTREE AWARD
Recipient: Larry Kinsella
Larry Kinsella is eminently worthy of Crabtree Award for his commitment to volunteerism and site stewardship, service to avocational organizations, efforts in education and public outreach, experimental and replicative archaeology, high excavation standards, and knowledge of American Bottom archaeology. Mr. Kinsella has served several terms as president of both regional and local combined avocational/professional societies. He is an expert in primitive technology with a special focus on lithic technology. His efforts at education and public outreach are exemplary with demonstrations and lectures for all age groups (first graders, elderhostels, field schools, community colleges). He maintains a website and has replicated stone tools for the Discovery, Learning, and History channels. He is known for his work on archaeological sites, and his impeccable field techniques. He serves as a role model for all, but especially for adults who wish to become avocational archaeologists.

THE FYREXELL AWARD FOR INTERDISCIPLINARY RESEARCH
Recipient: Jane Buikstra
Jane E. Buikstra's career exemplifies the true spirit of inter-disciplinary archaeological research and it is a great honor to present her with the Society for American Archaeology's 2010 Fryxell Award. In the 1970's, Dr. Buikstra initiated a series of groundbreaking archaeological research projects that combined the detailed study of mortuary practices with human osteological analysis. This work focused on populations, was regional in scale, and was framed with an explicit problem-oriented research agenda that addressed significant questions within anthropological archaeology. The scope of her research program has expanded topically and geographically since that time and parallels her ever-widening national and international influence on the archaeological community. During this time Buikstra has trained a generation of scholars to make inter-disciplinary connections and to combine bioarchaeological research with innovative techniques (e.g., stable isotope geochemistry, ancient DNA) to test ideas about past diets, population movements, and other aspects of human history and prehistory. This award is presented in recognition of her life-long commitment to inter-disciplinary scholarship and teaching.

LIFETIME ACHIEVEMENT AWARD
Recipient: Patty Jo Watson
Patty Jo Watson is the 2010 recipient of the SAA Lifetime Achievement Award in recognition of her multi-decade, international record of scholarship and service to the profession. Dr. Watson has produced an outstanding corpus of scholarly research that has changed our field. She has contributed substantially to scholarship in the Near East and North America; she has pioneered research on the origins of agriculture, ethnoarchaeology, and archaeological epistemology; and she has been instrumental in establishing an interdisciplinary research paradigm that Americanist archaeologists now use. She has mentored countless students and junior colleagues. Her service to the profession is also exemplary, from editing American Antiquity and serving on many SAA committees to representing our discipline in local, regional, state and national organizations. Patty Jo Watson is a global role model for archaeologists as a person and as a consummate professional, and we are pleased to present her with this award.

contributing to a worthy cause. How
does the silent auction work? First, sign
up for a bidder number at the NASC
booth. Then, when you see something
you want, decide how much you’d like to
spend and write your bid and bidder
number on the bid sheet. Of course,
once others see your bid, they might
decide to make an offer as well. So,
you’ll have to stop by the booth from
time to time to see if your bid is still the
highest. If not, raise it, and keep on
trying. The bidding ends at Saturday at
noon.

The Ethics Bowl
Date: Thursday, April 15

Gordon Willey Symposium on the History of Archaeology: Shovel Ready: Archaeology & Roosevelt’s New Deal for America (Sponsored by History of Archaeology Interest Group)
Date: Thursday, April 15
Time: 1:00 pm−4:45 pm
Location: 220 (AC)
SAA was founded 75 years ago during the Great Depression. That same year the newly created WPA—the major New Deal work relief program—funded the first of many significant excavations. Today, the US again faces major economic turmoil, and it is time to reconsider the legacy of New Deal archaeology. New Deal excavations continue to shape our understanding of the past as we invoke new technologies and new theoretical approaches to old collections. Archaeologists have also turned to excavating material remains of the New Deal itself. Join our exploration of the past, present, and future of New Deal archaeology.

CELEBRATE ARCHAEOLOGY BY USING YOUR BALLOT!
As in the past, your registration package includes a ballot for the Archaeology Week/ Month Poster Contest. In the back of Exhibit Hall 1 (AC), these colorful advertisements for archaeology will be displayed beginning on Thursday morning. Use your ballot to vote for the one you like best. The ballot box is located near the poster display. The balloting will close at 12 pm on Friday, and the winners will be honored at the Annual Business Meeting and Awards Celebration at 5 pm on Friday. This is the tenth year the poster contest has been co-sponsored by SAA’s Public Education Committee and the Council of Affiliated Societies.

A WORD ABOUT THE SESSIONS

The sessions that make up the bulk of the program fall within four categories:

**Forum**—An interactive format organized around a tightly focused theme. Formal presentations are kept to a minimum to encourage discussion between presenters and audience.

**General Session**—Consists of Posters, Contributed Papers (15 minutes), or Research Reports (15 minutes), each submitted individually by its author(s). Presentations are grouped together by the program chair around a particular theme, usually geographic or methodological. Session chairs are designated by the program chair.

**Symposium**—Generally, a group of 15-minute presentations on a well-defined theme submitted together by an organizer. The organizer may or may not also chair the Symposium. Also includes poster presentations submitted as a group and organized around a single theme.

**Electronic Symposium**—A discussion format in which the organizer posts the papers on the web at least one month before the meeting. No papers are read at electronic symposium as it is assumed that attendees will have read the material beforehand. Generally a few minutes summary of the papers are the introduction to the two-hour discussion session.

Any of these sessions may be “sponsored” and/or “invited.” The designation “sponsored” indicates the support an SAA committee, or an organization outside SAA. The designation “invited” reflects a special status and role within the meeting, as defined by the Program Committee Chair. All sponsored and invited sessions are subject to review by the Program Committee, as are all other submissions, and are subject to the three-role rule. Because numerous committees wish to sponsor sessions, the Program Committee must balance such requests with other program goals; as a result, in some circumstances, requests for sponsored sessions may be rejected. The only exceptions to the review process and three-role rule are the opening and plenary sessions.

*Note: All poster sessions are now 2 hours in duration. Please check for the new schedule for these sessions on Thursday, Friday, and Saturday in the Summary Schedule as well as in the Sessions at a Glance.*

SAA’s 76th Annual Meeting in 2011!

Plan now to attend the SAA 76th Annual Meeting in Sacramento, CA March 30–April 3, 2011. Guidelines for contributors (Call for Submissions) who wish to submit papers, posters, or forums for consideration were mailed to all members in early April 2010 and will be available at the SAA booth in the Exhibit Hall in St. Louis, through SAAweb (www.saa.org), or by request from SAA. The Online Submissions System for St. Louis will open on May 3, 2010.
